Codebook for City Nuisance Property Ordinances

Prepared by the Center for Public Health Law Research Staff

AUGUST 2019

City Nuisance Property Ordinances

This codebook describes the variables in a dataset that examines the variation in city ordinances related to nuisance properties. This dataset is longitudinal and captures ordinances in effect from August 1, 2017 through August 1, 2019. The jurisdictions selected for measurement are the 40 largest cities, by population, in the United States.

This codebook should be used in conjunction with the statistical data extract that can be downloaded from the dataset homepage by clicking on the Data button. There are four standard variables in every LawAtlas dataset. They are:

JURISDICTION

This is a dropdown selection in each coding form. It includes the jurisdictions coded in the dataset.

EFFECTIVE DATE

This date (MM/DD/YYYY) is the most recent effective date of the legal text captured for this place. The effective date represents the date the policy coded was put into effect.

VALID THROUGH DATE

This date (MM/DD/YYYY) is either the last date a law or policy was in effect prior to an amendment or the last date the researcher confirmed the law or policy was in effect during the research process.

LEGAL TEXT

This is a text box that captures all legal text relevant to the coding questions. This will not download into Microsoft Excel.
