Codebook for Response: National Legislation Implementing the IHR(2005)

Prepared by the Institute of Health Law (University of Neuchâtel, Switzerland) Staff

FEBRUARY 2019

Response: National Legislation Implementing the IHR(2005)

This codebook should be used in conjunction with the statistical data extract that can be downloaded from the dataset homepage by clicking on the Data button. There are four standard variables in every LawAtlas dataset. They are:

JURISDICTION

This is a dropdown selection in each coding form. It includes the jurisdictions coded in the dataset.

EFFECTIVE DATE

This date (MM/DD/YYYY) is the most recent effective date of the legal text captured for this place. The effective date represents the date the policy coded was put into effect.

VALID THROUGH DATE

This date (MM/DD/YYYY) is either the last date a law or policy was in effect prior to an amendment or the last date the researcher confirmed the law or policy was in effect during the research process.

LEGAL TEXT

This is a text box that captures all legal text relevant to the coding questions. This will not download into Microsoft Excel.

Questions
