

# Codebook for School Discipline Laws

**Prepared by the Center for Public Health Law Research Staff**

**DECEMBER 2018**

## School Discipline Laws

School discipline laws regulate the use of exclusionary discipline for students, such as expulsion and suspension from school. These laws typically determine the types of student conduct that either require or allow expulsion or suspension, minimum and maximum lengths of exclusion from school, alternatives to exclusionary discipline, and reporting requirements. This longitudinal dataset identifies and displays key features of state-level school discipline laws in effect from January 1, 2008 to December 1, 2018 across all 50 states and the District of Columbia.

This codebook should be used in conjunction with the statistical data extract that can be downloaded from the dataset homepage by clicking on the Data button. There are four standard variables in every LawAtlas dataset. They are:

### **JURISDICTION**

This is a dropdown selection in each coding form. It includes the jurisdictions coded in the dataset.

### **EFFECTIVE DATE**

This date (MM/DD/YYYY) is the most recent effective date of the legal text captured for this place. The effective date represents the date the policy coded was put into effect.

### **VALID THROUGH DATE**

This date (MM/DD/YYYY) is either the last date a law or policy was in effect prior to an amendment or the last date the researcher confirmed the law or policy was in effect during the research process.

### **LEGAL TEXT**

This is a text box that captures all legal text relevant to the coding questions. This will not download into Microsoft Excel.
